Nationality: Malaysian

PROFESSIONAL PROFILE

- Senior Flutter developer with 4+ years shipping production cross-platform apps end to end, from architecture through App Store/Play Store release, plus native platform-channel experience for iOS/Android integration.
- Confident, daily AI-tool user: uses Claude Code and Claude Cowork for architecture decisions, refactoring, and self-review as standard practice, critically evaluating output rather than accepting it uncritically.
- Architecture and technical leadership: led an 8-member team from discovery through production, owns technical decisions, and applies Clean Architecture consistently, cutting code complexity 50% at Mahiran Digital.
- Genuine mentoring track record: runs recurring Dart/Flutter and Laravel workshops for students and fresh graduates, and owns code review and best-practice standards across teams, not a one-off.

TECHNICAL SKILLS

Flutter & Native

Flutter, Dart, GetX/Provider/Riverpod/BLoC/Cubit, Native Platform Channels (Swift/Kotlin), Clean Architecture, App Store/Play Store release, CI/CD, Agile/Scrum.

Architecture, Mentoring & AI

Software architecture and design patterns, code review, technical mentoring, Claude Code, Claude Cowork, Cursor, critical AI-output evaluation.

APIs, Security & Backend

REST API design/integration, Payment Gateways, Zimperium (zShield/zDefend), Firebase, MySQL, PostgreSQL, Docker, Git, Postman.

WORK EXPERIENCE

Mobile Security Engineer

01/2026 - present

Vigilant Asia Sdn. Bhd, Kuala Lumpur, Malaysia

Tech stack: Zimperium Mobile Security Solutions, Android, Magisk, Frida, Flutter, Native Platform Channels

- Monitor and harden a live mobile app used by 20+ million people daily, the same post-launch discipline of catching problems before users do that this role calls for.
- Implemented callback-based security SDK using native bridging, reducing threat detection time from 30s to <2s real-time response.
- Investigate and fix mobile app issues before they reach end users, cutting vulnerabilities by 85% through structured testing and clear, actionable fixes.
- Established real-time threat monitoring and incident response process, identifying and researching critical security threats to source, tracking 200+ daily security events with 99.7% accuracy.

Freelance Developer

04/2022 - present

Tech stack: Flutter, Dart, Firebase, Laravel, PHP, MySQL, Kotlin, MQTT

- Served as technical point of contact for freelance clients end to end, from architecture and feature planning through release and post-launch monitoring, delivering 8+ apps at 99.5% uptime.
- Built NADI Meditech app handling 1,000+ daily medical records with complex RBAC and background data

synchronization.

- Implemented real-time sensor data sync via MQTT, reducing sync conflicts by 75% across distributed systems.

Full Stack Mobile Engineer

03/2025 - 12/2025

Two Q Alliance Sdn. Bhd, Putrajaya, Malaysia

Tech stack: Flutter, GetX/Provider, Dart, Firebase, Payment Gateways, Laravel, MySQL, PostgreSQL, Docker

- Set technical direction and owned architecture decisions for the UMPSA SuperApp as Lead Developer, guiding an 8-member team from feature planning through Play Store release for 20,000+ daily users.
- Delivered 4 government projects (EIPTS, PSOH, MOBE, UMPSA) serving 100,000+ users across 3 ministries (KPT, JPSM, MPOB).
- Reviewed code and mentored the team on architecture and best practices while integrating 40+ backend API endpoints, cutting crash rate from 2.5% to 0.3% and improving response time 35%.
- Integrated iBayar payment gateway processing 500+ monthly transactions, reducing payment cycle from 5 days to real-time.

Full Stack Developer (Internship)

07/2024 - 02/2025

TriSquare Technology (M) Sdn. Bhd, Kuala Lumpur, Malaysia

Tech stack: Flutter, GetX/Provider, Dart, Firebase, Payment Gateways, Laravel, MySQL, PostgreSQL, Docker

- Developing secure APIs for mobile and web applications, ensuring seamless integration and data consistency.
- Integrated Gemini AI and the VirusTotal API into backend workflows, reducing manual security checks by 80%.
- Gained hands-on experience in deploying applications to production environments and managing hosting.
- Developed proficiency in integrating third-party APIs, including security-focused APIs like VirusTotal.

Mobile Developer

10/2022 - 05/2023

Mahiran Digital Sdn. Bhd, Pahang, Malaysia

Tech stack: Flutter, Dart, Getx/Provider, Clean Architecture, Rest APIs

- Developed 5 mobile apps for 15,000+ total users using Flutter and specialized background execution modules.
- Implemented Clean Architecture principles, reducing code complexity by 50% and improving team maintainability.
- Delivered projects 15 ahead of schedule with a 98% bug-free rate in production environments.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours

02/2022 - 06/2024

Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia

Diploma in Computer Science

06/2019 - 01/2022

Universiti Malaysia Pahang Al-Sultan Abdullah, Malaysia.

HONOURS AND AWARDS

- 1st Place — Astro NACSA Coding Challenge 2024 (CipherKey, awarded by PM of Malaysia)
- Gold Award — Best Final Year Project, UMPSA (lastPiece M-Commerce)
- Winner — UMP Huawei ICT Competition 2023 (everBrain AI)
- Silver Award — iCE-CInno 2024 (GooLancer Platform)
- Best Project & 5th Place Overall — DICRATHON 2024 (MySihat Telehealth)

ADDITIONAL SKILLS & INTERESTS

Languages: English (B2), Malay (C1), Tamil (Native), German (A1, actively learning), Spanish (A1)

Interests: Teamwork, Engineering complex Lego Ideas sets, wood-working and problem-solving and badminton player.
